Test Catalog

Personality

04 Emo

ID-Emotional Intelligence

The ID-Emotional Intelligence (Emo) is a personality test that first identifies your preferred style from among 16 main personality types and then describes the impact of this style in various contexts. It provides information on how you manage your emotions and your interactions with others. It is therefore a very complete portrait that will help you to better situate yourself in relation to your style and preferences.

Target audience
All levels of positions in an organization. Intended for an adult population in a development context.

Time required
30 minutes

ID-Intercultural

06 Int

The ID-Intercultural (Int), *previously Intercultural Effectiveness (IET)*, is a tool that assesses the extent to which people are willing to take on roles in a culture different from their own. The test is a self-diagnostic tool and identifies comfort and risk zones that must be considered when assessing the relevance of working outside one's country of origin. Cognitive, social, and emotional factors are assessed considering different cultures. The test is based on a conceptual approach and has been standardized by professionals and executives working abroad.

Target audience
People of different hierarchical levels who plan to work abroad or with members of a cultural community different from their own.
